Pineta Experience

Pineta Experience: **our mission**

The **Pineta Experience** method is based on awareness and lifestyle improvement. A hectic life, alcohol, smoking, stress, insomnia, electromagnetic waves and an unhealthy diet put a strain on our bodies, releasing free radicals and often leading to premature ageing.

Our mission is to improve the quality of life of our guests by teaching a healthy and correct lifestyle, in order to improve everyone's performance, bringing out the best in each person.

This is why the top wellness consultants we work with have created specific programmes with different objectives exclusively for our guests:

- **Stress relief**
- **Purification and detoxification of the body**
- **Slimming and toning**
- **Antiaging for the face and body**
- **Improved sleep quality**

Our beauty journey begins in the Spa and continues at home through the tips that are given to you during your stay in our **Beauty Nature Spa**.

All the cosmetic products we use originate from our territory, with certified organic, eco green, vegan friendly fragrances and active ingredients.

They are fragrance, petrolatum, paraben and allergen free - that's our philosophy. The packaging is recyclable and has a low environmental impact. Everything reflects our love and respect for the environment, giving the best comfort and the most special pampering to our guests.

Decontracting

Nordic

Rebirth

PineThai

60 min. 84€

From June to September you can experience it in our forest, surrounded by the scents of nature.

A plunge in the cradle.

When stress and insomnia are just a bad memory.

Our cradle is a wellness treatment that allows you to completely relax your body by floating in a float pod, in a foetal position without contact with water, with numerous benefits at muscular, vertebral, circulatory and nervous levels. Treatment in the float pod takes you back to the prenatal state, into the protective womb. The state of relaxation, the water pressure and the constant temperature allow for maximum absorption of the treatment elements from scrubs and wraps.

The most extraordinary benefit of the float pod is related to relaxation: one hour of sleep in the tub is comparable to 8 hours in a normal bed!

You have to try it!
